

WSID 50th Certified Rib Sets

Publication Date: April 2016

Certified WorldSID 50th spare part rib sets are available in multiple configurations to meet customer needs.

Sets of ribs can be certified as spare parts and are available for the shoulder, thorax, and abdomen.

Pre-tested rib sets can save time and effort over replacing individual non-certified ribs. Since the qualified sets have been processed and verified to ensure compliance, users don't have to shave and tweak the ribs themselves to make them pass.
