## CALIBRATION

In recognition of the successful completion of the A2LA evaluation process, accreditation is granted to this laboratory to perform the following calibrations<sup>1</sup>:

### I. Mechanical

Parameter/Equipment	Range	CMC <sup>2,3</sup> ( $\pm$ )	Comments
Rotary Displacement Transducer	+/- 75 mm	0.2 % F.S.	TL-WI-00003H CL-PR-00025C
Linear Displacement Transducers	(0 to 72) mm	0.2 % F.S.	TL-WI-00034H CL-WI-00001C
Chest Potentiometer Assemblies	(0 to 90) mm	0.5 % F.S.	SAE J2517:2016

<sup>1</sup> This laboratory offers commercial calibration service.

<sup>2</sup> Calibration and Measurement Capability Uncertainty (CMC) is the smallest uncertainty of measurement that a laboratory can achieve within its scope of accreditation when performing more or less routine calibrations of nearly ideal measurement standards or nearly ideal measuring equipment. CMCs represent expanded uncertainties expressed at approximately the 95 % level of confidence, usually using a coverage factor of  $k = 2$ . The actual measurement uncertainty of a specific calibration performed by the laboratory may be greater than the CMC due to the behavior of the customer's device and to influences from the circumstances of the specific calibration.

<sup>3</sup> The "Rounded % Full Scale" is chosen to be conservative and larger than the determined "CMC".

# Accredited Laboratory

A2LA has accredited

## HUMANETICS

Huron, OH

for technical competence in the field of

## Mechanical Testing & Calibration

This laboratory is accredited in accordance with the recognized International Standard ISO/IEC 17025:2017 *General requirements for the competence of testing and calibration laboratories*. This laboratory also meets the requirements of ANSI/NCSL Z540-1-1994 and R205 – Specific Requirements: Calibration Laboratory Accreditation Program. This accreditation demonstrates technical competence for a defined scope and the operation of a laboratory quality management system (refer to joint ISO-ILAC-IAF Communiqué dated April 2017).

Presented this 5<sup>th</sup> day of October 2022.
