Data Sheet

THOR-5F STORAGE CHAIR

474-8400

Humanetics recommends storing the THOR-5F in its dedicated storage chair whenever the ATD is not in use. Keeping the dummy properly supported in an upright position helps prevent permanent deformation of the rubber spine segments and protects the condition of your THOR-5F between tests.

Proper storage is part of proper ATD care

The THOR-5F is an advanced anthropomorphic test device engineered to deliver detailed, repeatable data in demanding frontal-impact testing. Protecting that capability requires careful handling not only during test preparation, but also when the dummy is not in use.

The **THOR-5F Storage Chair** provides a dedicated solution for supporting and storing the ATD between tests, helping laboratories establish a consistent approach to everyday dummy handling.

The THOR-5F Storage Chair is designed to support the dummy through upright brackets that attach to the neck, back of the spine and pelvis cavity. This helps keep the dummy's weight off the pelvis structure during storage, providing proper support while the ATD is not in use.

A dedicated storage solution makes good ATD care easier to build into everyday laboratory practice. The THOR-5F Storage Chair provides a practical home for the dummy between tests, supporting a more organized approach to handling, storage and test preparation.

Available Products

474-8400 STORAGE CHAIR ASSY, THOR-5F
474-8120 NECK STORAGE ASSY, THOR-5F

TOTAL HEIGHT		CHAIR BOTTOM HEIGHT	
50.0 in.	1168 mm	25.1 in.	636.8 mm
WIDTH		**DEPTH**	
20.9 in.	529.6 mm	20.9 in.	531.8 mm
